

TRUCK MOUNTED CABLE REELER

EMC -500 D

The **Truck Mounted Cable Reeler EMC-500D** is the latest design and meets all requirements for the mining electric cable handling. This new version is easier and safer for the operation, full remote control for crane and reeler, isolated cab and better visibility than the previous models. Its features are:

- Powerful INTER 7600 6x4 truck equipped with automatic transmission, Cummins engine 350 HP.
- Reeler turntable +/- 90 degrees rotation based on rack and pinion with twin hydraulic cylinders, given soft control and high torsion moment to place or retrieve cable from long distances.
- Articulated crane with special lifting bar for easy drums load and unload.
- 500 m (1500 Ft) cable capacity on drums.

Two drums mounted allow the cable reeler work with 3000 Ft of electric cable at a time.

A strong rear hydraulic arm can easily place the cable on road, bench cut or road.

Safety guards on cab, catwalks and handrails according with SAE standards.
